FOR IMMEDIATE RELEASE

January 19, 2024

Citywide Boil Advisory and Faucet Dripping

As we continue to navigate challenging weather conditions, we want to remind you that our city remains under a boil advisory. The safety of our water supply is of utmost importance.

Additionally, forecasted freezing temperatures for the upcoming weekend necessitate the continuation of precautions. We kindly urge all customers to drip their faucets to prevent freezing.

“In these critical times, each drop saved contributes to the sustainable management of this essential resource,” said William Daniel, Director of Water and Sewerage. “Your conscientious efforts in water conservation play a pivotal role in securing a resilient water supply for our community. Thank you for your understanding and cooperation.”
